Save.

Share.

Spend.

Here's a super easy and fun way to help your child learn about money.
Teach them the value of saving and sharing, and how to enjoy spending thoughtfully.

Follow these steps:

1. Color and decorate the labels.
2. Place the labels on a jar of your choice - think peanut butter or jelly jar, even a mason jar!
3. As money is added to the jar, have your child count the dollars and coins and compare how many pieces of money are in the jars.
4. Talk about how your child could use the money they put into each jar.

Set the stage for your child's future success!
